APPENDIX B

**TELECOMMUNICATION ANTENNA
SITING PROTOCOL EXCLUSION LIST**

TELECOMMUNICATION ANTENNA SITING PROTOCOL EXCLUSION LIST

Industry Canada has determined that certain antenna structures are considered to have minimal impact on the local surroundings and do not require consultation with the Land Use Authority or the public. The following excerpt from Industry Canada's publication, "Radiocommunication and Broadcasting Antenna Systems CPC-2-0-03" lists the types of antenna installations exempted from the requirement to consult with the local land use authority and the public. The installations listed are therefore excluded from Schedule 5 Section 7, Telecommunication Antenna Siting Protocol in the Village of Glenwood Land Use Bylaw.

Section 6. Exclusions

For the following types of installations, proponents are excluded from the requirement to consult with the land use authority and the public, but must still fulfill the General Requirements outlined in section 7 [of CPC-2-0-03]:

- maintenance of existing radio apparatus including the antenna system, transmission line, mast, tower or other antenna-supporting structure;
- addition or modification of an antenna system (including improving the structural integrity of its integral mast to facilitate sharing), the transmission line, antenna-supporting structure or other radio apparatus to existing infrastructure, a building, water tower, etc. provided the addition or modification does not result in an overall height increase above the existing structure of 25% of the original structure's height;
- maintenance of an antenna system's painting or lighting in order to comply with Transport Canada's requirements;
- installation, for a limited duration (typically not more than 3 months), of an antenna system that is used for a special event, or one that is used to support local, provincial, territorial or national emergency operations during the emergency, and is removed within 3 months after the emergency or special event; and
- new antenna systems, including masts, towers or other antenna-supporting structure, with a height of less than 15 metres above ground level. Individual circumstances vary with each antenna system installation and modification, and the exclusion criteria above should be applied in consideration of local circumstances. Consequently, it may be prudent for the proponents to consult the Land Use Authority and the public even though the proposal meets an exclusion noted above. Therefore, when applying the criteria for exclusion, proponents should consider such things as:
 - the antenna system's physical dimensions, including the antenna, mast, and tower, compared to the local surroundings;
 - the location of the proposed antenna system on the property and its proximity to neighbouring residents;

- the likelihood of an area being a community-sensitive location; and
- Transport Canada marking and lighting requirements for the proposed structure. Proponents who are not certain if their proposed structure is excluded, or whether consultation may still be prudent, are advised to contact the land-use authority and/or Industry Canada for guidance.
